Contents

1. Introduction: cosmic origin of elements

・Origin of (heavy nuclei), observation

2. Neutron capture nucleosynthesis

・s-process, r-process origin of heavy elements

3. Galactic Chemical evolution (r-process elements)

・astrophysical sites, galactic chemical evolution

4. Proton-rich nuclei

・p-process and ν p-process

5. Reaction rate uncertainty in nucleosynthesis

・reaction rate variation and MC nucleosynthesis
